

TEST CASE REPORT

TC-04: Privacy and Soft-Deletion

Name: M Naga Sai Abhiram

SRN: PES1UG24AM151

1. Test Case Identification

Test Case ID	TC-04
Test Case Title	Privacy and Soft-Deletion
Requirement ID	NFR-001
Requirement Type	Non-Functional Requirement
Test Category	Privacy / Security
Priority	High
Test Owner	M Naga Sai Abhiram - PES1UG24AM151

2. Requirement Under Test

NFR-001: The system shall protect user profile data and feedback scorecards according to applicable privacy requirements and support soft-deletion of requested data within 24 hours.

3. Test Objective

To verify that the system prevents unauthorized access to protected user profile data and feedback scorecards, and that requested data is soft-deleted within 24 hours of a valid deletion request.

4. Test Scope

In Scope:

- Protection of user profile data from unauthorized access.
- Protection of feedback scorecards from unauthorized access.
- Processing of valid data deletion requests.
- Soft-deletion of requested data.
- Verification that soft-deletion is completed within 24 hours.

Out of Scope:

- Mentor recommendation and matching.
- Session booking and calendar synchronization.
- Double-booking prevention.
- Creation and recording of interview scorecards.
- System performance and peak-load testing.

5. Preconditions

1. The system is available for testing.

2. A valid user account exists with profile data.
3. At least one feedback scorecard associated with the test user exists.
4. A second account is available to simulate unauthorized access.
5. A valid mechanism for requesting deletion of user data is available.
6. The system provides a way to verify the soft-deletion status and completion time of requested data.

6. Test Data

Test Data	Description	Purpose
Test User A	Authorized owner of the profile and associated data.	Used to verify authorized access and submit a deletion request.
Test User B	Separate user without permission to access User A's protected data.	Used to verify unauthorized access is denied.
Profile Data	Sample profile information belonging to Test User A.	Used to verify privacy protection.
Feedback Scorecard	Sample scorecard associated with Test User A.	Used to verify privacy protection.
Deletion Request	A valid request to delete specified user data.	Used to trigger the soft-deletion process.

7. Test Procedure

Step	Action	Expected Result
1	Log in as Test User A.	Authentication succeeds.
2	Access Test User A's permitted profile data.	Authorized access is allowed.
3	Access permitted feedback scorecard data.	Access follows the system's authorization rules.
4	Log in as Test User B.	Authentication succeeds.
5	Attempt to access Test User A's protected profile data without authorization.	Access is denied.
6	Attempt to access Test User A's protected feedback scorecard data without authorization.	Access is denied.
7	Submit a valid deletion request for the requested data.	The deletion request is accepted and recorded.
8	Monitor or verify the processing of the deletion request.	The request is processed and the requested data is marked for soft-deletion.

9	Verify the completion time of the soft-deletion process.	Soft-deletion is completed within 24 hours of the valid request.
10	Attempt to access the soft-deleted data through normal system operations.	The soft-deleted data is no longer accessible through normal operations.
11	Verify the deletion state using available system or backend records, where applicable.	The requested data is identified as soft-deleted rather than remaining active.

8. Expected Results

- Unauthorized users are prevented from accessing protected user profile data.
- Unauthorized users are prevented from accessing protected feedback scorecards.
- A valid deletion request is accepted and recorded.
- Requested data is soft-deleted successfully.
- Soft-deletion is completed within 24 hours of the deletion request.
- Soft-deleted data is no longer accessible through normal system operations.

9. Acceptance / Pass-Fail Criteria

PASS: The test case passes if unauthorized access to protected profile data and feedback scorecards is denied, and all requested data is successfully soft-deleted within 24 hours.

FAIL: The test case fails if unauthorized access is possible, a valid deletion request is not processed, the data remains active or accessible through normal operations, or soft-deletion takes more than 24 hours.

10. Test Status

Execution Status	Not Executed
Reason	This report specifies the test case and expected results. No system implementation is being tested as part of this report.
Final Result	Pending / Not Applicable until implementation is available
