Field	Details
Use Case ID	UC-02
Use Case Name	Book Mentorship Session
Primary Actor	Student Mentee
Supporting Actors	Alumni Mentor, Calendar Service

Description

This use case describes how a Student Mentee books an available mentorship or mock interview session with an Alumni Mentor.

Preconditions

1. The Student Mentee is authenticated in the system.
2. The Student Mentee has identified or selected a suitable Alumni Mentor.
3. The Alumni Mentor has available time slots in their availability calendar.
4. The Calendar Service is available.

Postconditions

1. A mentorship session is successfully created for the selected Student Mentee and Alumni Mentor.
2. The selected time slot is reserved and cannot be double-booked.
3. The confirmed session is added to both participants' calendars.
4. A meeting link and booking confirmation are provided to the relevant participants.

Main Success Scenario

1. The Student Mentee selects an Alumni Mentor.
2. The system displays the selected mentor's available time slots.
3. The Student Mentee selects a preferred available slot.
4. The system verifies that the selected slot is still available.
5. The system creates the mentorship session booking.
6. The system reserves the selected slot to prevent double-booking.
7. The system adds the confirmed session to the Student Mentee's and Alumni Mentor's calendars.
8. The system generates or retrieves the meeting link for the session.
9. The system sends a booking confirmation to the relevant participants.
10. The use case ends successfully.

Alternate Flow: Selected Slot Is No Longer Available

4a. Selected slot unavailable:

1. During slot verification, the system determines that the selected slot has already been booked or is no longer available.
2. The system does not create the booking.
3. The system informs the Student Mentee that the selected slot is unavailable.
4. The system displays the currently available slots.
5. The Student Mentee selects another available slot.
6. The flow returns to Step 4 of the Main Success Scenario.
